SUMX
OFFICIAL WHITEPAPER

Version 1.0

BNB Smart Chain (BSC) | BEP-20

A community-focused token initiative within the wider SLM ecosystem.

Total Supply: 100,000,000 SUMX

Node Program: 50,000 Nodes | 90-Day Active Period

This whitepaper describes the planned SUMX token allocation, node reward framework, vesting structure, and ecosystem direction. Details not yet finalized are identified as pending official announcement.

Version 1.0 | November 2026

Document Information

Item	Details
Project	SUMX
Document	Official Whitepaper
Version	1.0
Network / Standard	BNB Smart Chain (BSC / BEP-20)
Total Supply	100,000,000 SUMX
Token Price	To be announced officially
Contract Address	To be announced officially

1. Introduction

SUMX is a planned digital asset initiative within the wider Selim Token (SLM) ecosystem. It is intended to add another participation and utility layer to the ecosystem through a defined token distribution framework and a community-oriented Node Program.

The SUMX framework is designed around transparent allocation, published vesting periods, and a structured reward pool. Implementation details, product features, and launch arrangements will be communicated through official channels as they are finalized.

2. Vision and Objectives

SUMX aims to support long-term ecosystem participation through a clear token framework and planned community mechanisms.

Key objectives include:

• Establish a documented token supply and allocation structure.
• Support community participation through a dedicated allocation.
• Introduce a Node Program with a defined active period and reward pool.
• Reserve tokens for liquidity, development, market operations, and future ecosystem growth.
• Apply lock and vesting periods to selected allocations to support orderly distribution.

3. SUMX Token Overview

Item	Current Plan
Token Name	SUMX
Network	BNB Smart Chain (BSC)
Token Standard	BEP-20
Total Supply	100,000,000 SUMX
Token Price	To be announced officially
Contract Address	To be announced officially

The total supply and allocation figures in this document represent the approved Version 1.0 framework. Any material changes will be communicated through official SUMX channels.

4. Token Allocation

The planned maximum supply of SUMX is 100,000,000 tokens, distributed across the following allocations:

Allocation	Amount (SUMX)	Share
Presale	20,000,000	20%
Market Reserve	10,000,000	10%
Community	25,000,000	25%
Developer	5,000,000	5%
Team	10,000,000	10%
Liquidity Pool (LP)	10,000,000	10%
Node Rewards	5,000,000	5%
Future Development	15,000,000	15%
Total	100,000,000	100%

5. Lock and Vesting Schedule

Allocation	TGE / Lock Terms	Vesting
Presale	50% unlocked at TGE	Remaining 50% over 3 months
Community	50% unlocked at TGE	Remaining 50% over 9 months
Developer	6-month lock	Not specified
Team	6-month lock	Not specified
Market Reserve	6-month lock	Not specified
Liquidity Pool	1-year lock	Not specified
Future Development	1-year lock	Not specified
Node Rewards	100% unlock	According to Node Program rules

The lock periods are stated as durations. Exact release frequency, unlock dates, wallet addresses, and on-chain enforcement details will be announced when finalized. No additional vesting schedule is implied where the table states “Not specified.”

6. SUMX Node Program

The SUMX Node Program is planned as a community participation and reward mechanism. The current framework includes 50,000 Nodes, with a 90-day active period for each Node.

Node Program Item	Planned Details
Total Nodes	50,000
Planned Node Value	10 USDT worth of SLM per Node, subject to final program rules
Active Period	90 days
Total Node Reward Pool	5,000,000 SUMX
Planned Reward per Node	100 SUMX over the 90-day period
Indicative Daily Reward	Approximately 1.1111 SUMX per day

Node reward calculation

The 5,000,000 SUMX Node Reward allocation divided equally across 50,000 Nodes results in a planned reward of 100 SUMX per Node. Spread evenly over 90 days, this is approximately 1.1111 SUMX per day. Actual reward distribution will

follow the final program rules and implementation.

7. Node Participation and Reward Conditions

The Node Program is intended to operate for a 90-day active period. Eligibility, activation, reward calculation, claim procedures, and any technical requirements will be published through official SUMX channels before the program begins.

The Node Reward allocation is designated for Node participants. Rewards are subject to the final program terms, technical implementation, and any applicable eligibility or verification requirements announced officially.

8. Ecosystem Role and Planned Utility

SUMX is intended to form part of the wider SLM ecosystem. The planned framework includes community participation, Node-based rewards, and support for future ecosystem development. Additional utilities or integrations may be introduced as the project develops and will be described in official announcements.

Any utility described in this document is a project plan. It should not be interpreted as a guarantee that a particular feature, integration, market value, or financial return will be delivered.

9. Development and Launch Information

The SUMX token price, contract address, deployment and launch schedule, presale dates, detailed Node activation process, and final claim mechanics have not been specified in this Version 1.0 document. These details will be announced through official SUMX communication channels when finalized.

The project may publish further technical and operational information, including token deployment details, liquidity arrangements, and program instructions, ahead of relevant launch or participation stages.

10. Transparency, Security and Risk Disclosure

Users should rely on verified official SUMX and SLM communication channels for contract addresses, announcements, and participation instructions. Always verify token and contract details carefully. Avoid unofficial links, impersonator accounts, and unsolicited requests for wallet credentials, recovery phrases, or private keys.

Digital assets involve substantial risks, including price volatility, liquidity risk, smart-contract vulnerabilities, regulatory uncertainty, and the possibility of partial or total loss. Token allocations, Node rewards, vesting schedules, and project plans do not guarantee market value, profit, or exchange listings. Users should conduct independent research and should not commit funds they cannot afford to lose.

11. Important Notes and Pending Details

The following details remain subject to official announcement or finalization: SUMX token price; contract address and verification information; launch and TGE dates; presale schedule and participation rules; Node activation and eligibility requirements; reward claim process; exact unlock frequency; liquidity venue and lock verification; and any additional technical or security review information.

12. Disclaimer

This whitepaper is provided for informational purposes only. It does not constitute financial, investment, legal, or tax advice, nor an offer or solicitation to buy or sell any digital asset. No return, profit, fixed market price, or exchange listing is guaranteed. All figures and mechanisms described as planned are subject to implementation and may be updated through official announcements. Participants should make independent decisions and seek qualified professional advice where appropriate.
